POST-CONSUMER RECYCLED MATERIAL

PCR

Post-consumer recycled materials (PCR) are reprocessed plastics from household or commercial waste, the majority of which were used for packaging

We have been involved with the use of recycled products for PCR materials for a long time. We would be happy to assist you in realising a recycling-based product for your application. Currently we have capable to produce the most of packagings in PCR material, such as PET bottles, HDPE bottles, PP jars, LDPE tubes, Pumps, sprayers and caps.

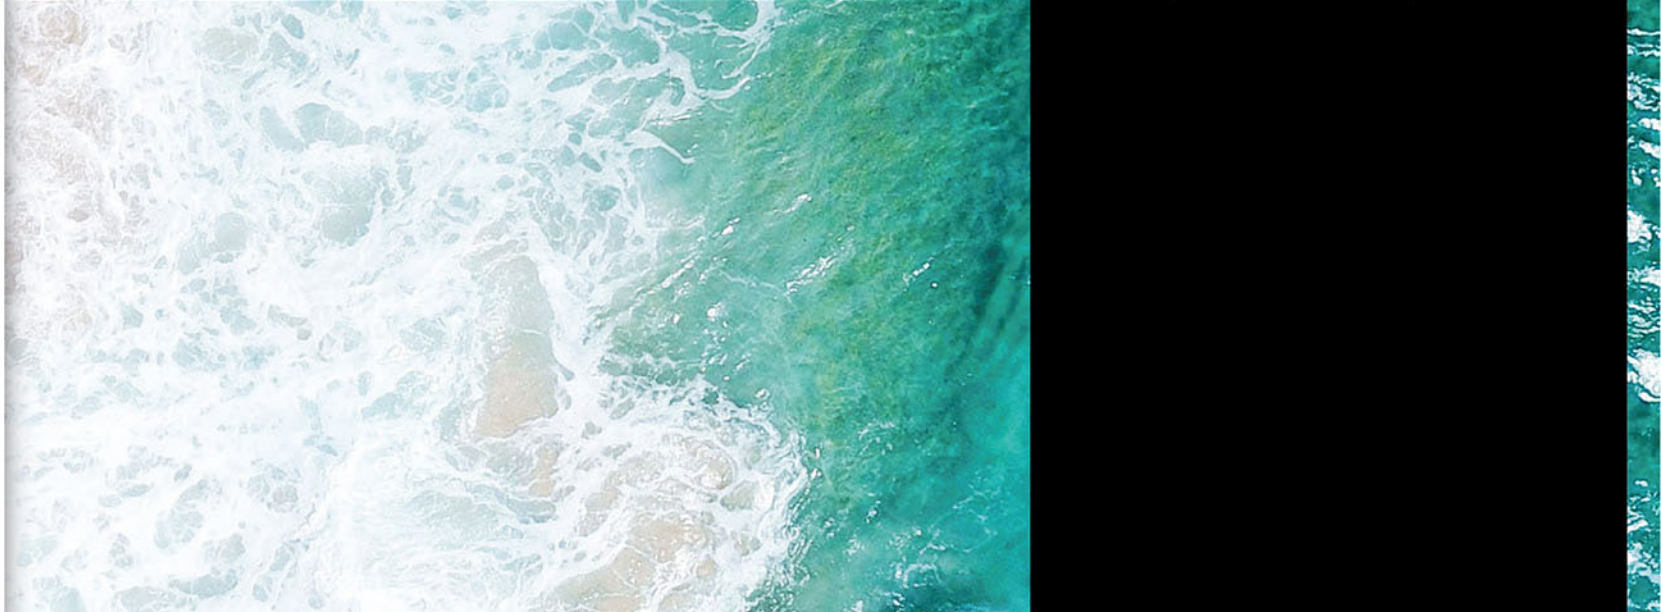

Further more, we're proud to supply packagings in bio-degradable material like Sugarcane tubes and PLA jars.
